GAMI CORPORATION INDONESIA

INDONESIAN BOTANICAL PRODUCTS

Herbal ingredients, cosmetic raw materials, and dried leaves sourced from Indonesia for global product makers.

BOTANICAL SOURCING PARTNER

PT GAMI MARINE INDONESIA

Herbal · cosmetics · dried leaves · custom sourcing

Indonesia · Global buyers

COMPANY POSITION

A botanical portfolio for buyers who need reliable raw-material formats, clear specification conversations, and a practical path from inquiry to export.

GAMI Corporation connects Indonesian botanical resources with international buyers across herbal, personal-care, cosmetic, tea, and ingredient channels. We work from the buyer’s intended use, required format, destination, and documentation needs.

ONE BOTANICAL CONVERSATION

Buyer advantage
Start with the material and end use. We align form, cut, drying or processing method, pack style, target volume, and destination requirements before quotation.

From Indonesian biodiversity to finished-product ideas.

Availability, grade, and documents confirmed per buyer inquiry.

FEATURED BOTANICAL INGREDIENT

Tengkawang for natural cosmetic formulations.

Commercial note: Refined, deodorized, organic, or certified variants are discussed only when available and documented for the specific lot.

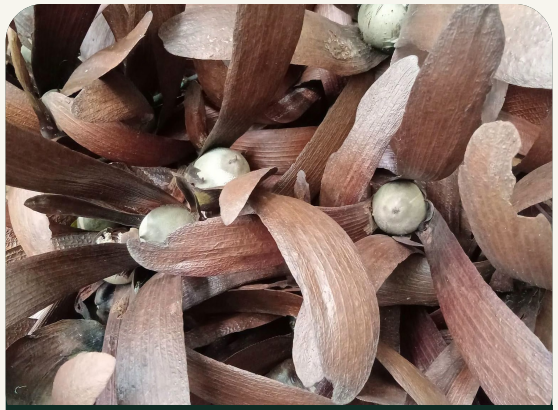

Tengkawang fruit

Fresh botanical material · field reference

Dried seed material

Dried whole / split material

Fruit & shell detail

Raw-material identification

Export specification

Identity

Illipe Butter / Tengkawang Butter · Shorea stenoptera

Origin

Wild-harvested from Borneo (Kalimantan), Indonesia

Quality

FFA max 3% · moisture max 0.5% · melting point 34–38°C

Packing

20 kg / 25 kg carton with food-grade inner plastic liner

Availability, grade, and documents confirmed per buyer inquiry.

HERBAL & COSMETIC INGREDIENT

Aloe vera for gentle personal-care concepts.

Important: Cosmetic and ingestible uses require the buyer's regulatory review, ingredient specification, permitted claims, and destination-market compliance.

West Kalimantan Giant Aloe Vera

Botanical reference: *Aloe barbadensis* Miller · Pontianak, West Kalimantan, Indonesia

Product form

Fresh whole leaves / dried aloe vera powder

Fresh-leaf grade

Approx. 800 g–1.5 kg+ per leaf · fresh green, clean, no physical damage or rot

Shelf life & pack

Up to 3–4 weeks under proper cold chain · 10 kg / 20 kg ventilated master carton

Availability, grade, and documents confirmed per buyer inquiry.

OILSEED RAW MATERIALS

Seeds for cold-pressed cosmetic oils.

Buyer note: Pressing yield, fatty-acid profile, microbiology, residual contaminants, and food/cosmetic regulatory status are confirmed through the agreed COA and destination requirements.

Dried Tamanu Nuts / Nyamplung Seeds

Calophyllum inophyllum · Indonesia

Use
Raw material for cold-pressed tamanu oil and cosmetic formulations

Grade
Dried whole nuts, with or without shell · mold- and insect-free

Specification
Moisture max 7% · foreign matter max 2%

Packing
25 kg / 50 kg PP woven bags or jute bags

Raw Candlenuts / Kukui Nuts

Aleurites moluccanus · Indonesia

Use
Oil extraction for hair and skin care; culinary use subject to buyer specification

Grade
Whole peeled nuts / shelled · pale white to yellowish

Specification
Moisture max 5% · broken nuts max 5–10% · insect- and fungus-free

Packing
10 kg carton box or 25 kg PP woven bag

Availability, grade, and documents confirmed per buyer inquiry.

AROMATIC INGREDIENTS

Patchouli: oil and dried botanical feedstock.

Oil documentation: Batch identity, PA content, acid value, specific gravity, origin, extraction date, and COA scope are aligned with the buyer before shipment.

Patchouli Essential Oil

Pogostemon cablin · steam distilled · viscous amber to dark brown liquid

Positioning
Fixative for perfumery and an ingredient for personal-care concepts

Export grade
Patchouli alcohol (PA) min 28–30% · acid value max 8.0

Physical
Specific gravity 0.950–0.975

Packing
25 kg jerrycan or 200 kg galvanized iron drum

Raw Dried Patchouli Leaves

Pogostemon cablin · Indonesia · dried leaves and stems

Use
Botanical feedstock for distillation, extraction, and fragrance applications

Specification
Moisture max 12–15% · foreign matter max 2%

Condition
Well-dried, distinct natural aroma, free from mold

Packing
25 kg / 50 kg PP woven bags or pressed bales

Availability, grade, and documents confirmed per buyer inquiry.

DRIED LEAVES & AROMATIC HERBS

Lemongrass, citronella, and centella formats.

Aromatic dried grass for botanical extraction and herbal tea, plus Centella asiatica for cosmetic, tea, and botanical ingredient programs. Final grade is confirmed by intended use and destination.

Drying conversation: Sun-dried or oven-dried, target moisture, color retention, aroma, microbial limits, cut size, and pack weight are agreed before production.

Lemongrass / Serai

Cymbopogon citratus · fresh reference

Bundled material

Harvest and handling reference

Dried Lemongrass / Citronella

Cymbopogon citratus / C. nardus

Cut leaves and stalks
Cut size 2–5 cm or customized
Moisture max 10–12%
Foreign matter max 1%

Centella / Gotu Kola

Centella asiatica

Dried whole leaves or chopped
Moisture max 10%
Foreign matter max 2%
Sun- or oven-dried, mold-free
25 kg / 50 kg PP woven bag

Availability, grade, and documents confirmed per buyer inquiry.

WELLNESS BOTANICALS

Moringa and turmeric for wellness programs.

Testing: Curcumin, mesh, color, microbiology, pesticide residue, heavy metals, and other requirements are quoted or confirmed according to the buyer's market.

Moringa Leaves

Moringa oleifera · Indonesia · leaves or fine powder

Applications
Wellness tea, superfood and botanical-extract concepts

Form
Dried leaves or fine powder · mesh 80–100

Specification

Packing
20 kg / 25 kg multiwall paper bag with inner plastic or carton box

Dried Turmeric

Curcuma longa · Indonesia · fingers or fine powder

Applications
Golden-milk, beverage, culinary, wellness, and cosmetic concepts

Form
Dried slices (fingers) or fine powder

Specification
Curcumin 3–5% depending on grade · moisture max 12%

Condition & pack
Free from mold and insects · 25 kg / 50 kg PP woven bag

Availability, grade, and documents confirmed per buyer inquiry.

HERBAL & COSMETIC PORTFOLIO

From raw botanical to formulation-ready format.

Choose the material first, then define how it should arrive. We can discuss the right preparation, packaging, and documentation path for the target market.

Best fit for: Ingredient importers · cosmetic manufacturers · tea blenders · natural brands · foodservice · distributors · private-label buyers.

RAW BOTANICALS

Seeds, fruit, leaves, roots, bark, flowers and aromatic plant material.

DRIED MATERIAL

Whole, cut, flakes, tea-cut, coarse powder or fine powder.

COSMETIC INPUTS

Butter, oil, gel, juice, extract or botanical blend by request.

TEA & WELLNESS

Infusion-grade leaves and herbs for blends, beverages and wellness concepts.

PRIVATE LABEL

Retail-ready pouches, jars, bottles or labels subject to formulation and MOQ.

BULK EXPORT

Food-grade inner packaging, master cartons, sacks, pallets and container planning.

Availability, grade, and documents confirmed per buyer inquiry.

REQUEST-BASED SOURCING

Need another botanical or a finished format?

Send the intended use, material, form, target specification, volume, destination, and documents required. We can check suitable Indonesian supply and return a product-specific quotation path.

Simple request brief: Material · botanical name if known · intended use · form · moisture · purity · pack weight · MOQ · target volume · destination · required documents.

HERBS & LEAVES

Moringa, centella, pandan, bay leaf, betel leaf, turmeric leaf, noni, guava and kaffir lime.

ROOTS & SPICES

Ginger, turmeric, galangal, cinnamon, cloves, cardamom, pepper and custom blends.

FLOWERS & TEA

Roselle, butterfly pea, jasmine, lemongrass, herbal tea cuts and infusion blends.

COSMETIC INPUTS

Aloe, illipe, tamanu, candlenut, patchouli, botanical powders, extracts and oils.

FORMATS

Fresh, dried, cut, powder, paste, gel, oil, butter, extract, retail-ready or bulk.

DOCUMENTS

COA, SDS, allergen statement, microbiology, phytosanitary or other market documents by need.

Availability, grade, and documents confirmed per buyer inquiry.

QUALITY & EXPORT WORKFLOW

Specification first. Shipment second.

Botanical products behave differently by species, harvest, drying method, and end use. That is why the quality conversation is defined per product and per lot before quotation or loading.

01 SOURCE
Supplier, origin, material

02 PREPARE
Clean, sort, dry or process

03 CHECK
Moisture, purity, condition

04 PACK
Food-grade pack and labels

05 SHIP
Documents and dispatch

Quality conversation before quotation

Botanical identity · grade · moisture · foreign matter · microbiology · pack · label · shelf life · documents

Availability, grade, and documents confirmed per buyer inquiry.

Start your botanical inquiry.

Send the material, preferred form, intended use, target volume, destination, and required documents. We will match the request with the most suitable available supply.
